Sam Mahdavi

FULL STACK DEVELOPER

Self-taught Full Stack Developer with 6+ years of experience — started coding at 19 out of passion, and never stopped. From designing REST APIs and database schemas to building responsive React interfaces and deploying on AWS, I've worked across the full stack from day one. Has led features end-to-end, improved system performance at scale, and mentored junior developers. Writes code that's clean, tested, and built to last. Equally comfortable working independently or driving a team forward.

WORK EXPERIENCE

Freelance Full Stack Developer

Jan 2025 – Present

Self-employed

- Delivered full-stack web apps for clients across e-commerce, real estate, and service industries using React, Node.js, and PostgreSQL.
- Built a custom booking platform integrating Stripe payments, reducing manual admin work by 70%.
- Refactored a legacy PHP CMS to Node.js + React stack, cutting page load time in half.
- Handled end-to-end project ownership — requirements, architecture, development, AWS deployment, and support.

Senior Full Stack Developer

Aug 2022 – Dec 2024

Etiya

- Spearheaded redesign of a B2B SaaS platform (React, Node.js, PostgreSQL), scaling from 10k to 80k active users with no downtime.
- Owned the full feature lifecycle across a team of 6 — sprint planning, code reviews, technical interviews.
- Rearchitected the payment flow with Redis-based session caching, cutting page load time by 60% and recovering ~\$15k/month.
- Standardised CI/CD using GitHub Actions and Docker Compose, shrinking release cycles from bi-weekly to daily.

Full Stack Developer

Jul 2020 – Jun 2022

ParsOnline

- Built and maintained REST APIs for a fintech dashboard used by 20k+ daily users with 99.9% uptime.
- Engineered a reusable React component library adopted across 4 internal products, cutting dev time by ~30%.
- Rewrote MongoDB aggregation pipelines, reducing query time from 4s to under 200ms.
- Migrated a monolith to AWS (EC2, RDS, S3, CloudFront), reducing monthly infrastructure spend by 25%.

Junior Full Stack Developer

Jun 2019 – Jun 2020

Bamilo

- Built product listing, cart, and order history pages in React integrated with Node.js/Express APIs.
- Implemented JWT authentication with refresh token rotation and RBAC, replacing a legacy session system.
- Pushed code coverage from 40% to 85% with Jest and React Testing Library, catching 3 critical pre-production bugs.

EDUCATION

High School Diploma — Graduated 2018

Self-Taught Programmer

Started coding at 19 — built skills independently through projects and continuous learning.
